- 1 The effects of plastic bags on the environment are really quite devastating. While there are many objections to the banning of plastic bags based solely on their convenience, the damage to the environment needs to be controlled.
- 2 There is no way to strictly limit the effects of plastic bags on the environment because there is no disposal method that will really help eliminate the problem. While reusing them is the first step, most people don't do that. These are bags not durable enough to survive numerous trips to the store. The best that citizens can do is to reuse them.
- 3 The biggest problem with this is that once they have been soiled they end up in the trash, which then ends up in the landfill or is burned. Either solution is very poor for the environment. Burning emits toxic gases that harm the atmosphere and increase the level of VOCs in the air while landfills hold them indefinitely as part of the plastic waste problem throughout the globe.
- 4 One of the greatest problems is that an estimated 300 million plastic bags end up in the Atlantic Ocean alone. These bags are very dangerous for sea life, especially those of the mammal variety. Any hunting mammal can easily mistake the size, shape and texture of the plastic bag for a meal and find its airway cut off. Needless deaths from plastic bags are increasing every year.

- 5 The environmental balance of the waterways is being thrown off by the rate of plastic bags finding their way into the mouths and intestinal tracts of sea mammals. As one species begins to die off at an abnormal rate, every other living organism in the waterways is impacted.
- 6 The indefinite period of time that it takes for the average plastic bag to break down can be literally hundreds of years. Every bag that ends up in the woodlands of the country threatens the natural progression of wildlife. Because the breakdown rate is so slow the chances that the bag will harmlessly go away are extremely slim. Throughout the world plastic bags are responsible for suffocation deaths of woodland animals as well as inhibiting soil nutrients. The land litter that is made up of plastic bags has the potential to kill over and over again. It has been estimated that one bag has the potential to unintentionally kill one animal per every three months due to unintentional digestion or inhalation.
- 7 While it's a noble thought to place the plastic bags in the recycling bin every week, studies have proven that there are very few recycling plants that actually recycle them. Most municipalities either burn them or send them off to the landfill after sorting. This is because it can be expensive to recycle this type of plastic. It doesn't melt down easily and is often not fit to be reused in its original form.
- 8 The premise of recycling these bags is nice. Yet funding for the upgrading of the recycling units just has not happened and thus less than 1% of all bags are sent to recycling plants worldwide. Most are left to become a pollution problem in one way or another.

- 9 There are always alternatives to plastic bags and the search for more alternatives continues. Paper bags are a possible option but they also take their toll on the environment. The use of trees to increase the production of paper products will also have a negative environmental effect.
- 10 Reusable plastic bags are being introduced to regions that want to outlaw the plastic bags altogether. These are stronger and more durable and can be used for three to five trips to the store. Of course, the reusable cloth bag is fast becoming a favourite among environmental supporters. While thus far no bag is without its issues, these are the bags that are currently recommended for use to help protect environmental concerns.
- (a) (i) Why do some people object to the banning of plastic bags ? 1
- (ii) Why is reusing plastic bags not considered practical ? 1
- (iii) Why is the disposal of plastic bags considered damaging to the environment ? 2
- (iv) How do plastic bags endanger the life of animals in the sea and on land ? 2
- (v) What factors discourage recycling of plastic bags ? 2
- (vi) What, according to the writer, is the best possible alternative to plastic bags ? 1
- (b) Find words from the passage which mean the same as the following : 3
- (i) remove (para 2)
- (ii) choking (para 6)
- (iii) costly (para 7)

2. Read the passage given below :

The outcasts were not allowed to mount the platform surrounding the well, because if they were ever to draw water from it, the Hindus of the three upper castes would consider the water polluted. Nor were they allowed access to the nearby brook as their use of it would contaminate the stream. They had no well of their own because it cost a lot of money to dig a well in a hilly town. Perforce they had to collect at the foot of the upper-caste Hindu well and depend on the bounty of some of their superiors to pour water into their pitchers. More often than not there was no upper-caste Hindu present. Most of them were rich enough to get the water-carriers to supply them with plenty of fresh water every morning for their baths and kitchens, and only those came to the well who were either fond of an open-air bath or too poor to pay for the water-carriers' services. So the outcasts had to wait for a chance to bring some upper-caste Hindu to the well, for luck to decide that he was kind, for Fate to ordain that he had time — to get their pitchers filled with water. They crowded round the well, congested the space below its high brick platform, morning, noon and night, joining their hands in servile humility to every passer-by; cursing their fate, and bemoaning their lot, if they were refused the help they wanted; praying, beseeching and blessing, if some generous soul condescended to listen to them, or to help them.

When Sohini reached the well there were already about ten other outcasts waiting. But there was no one to give them water. She had come as fast as she could to the well, full of fear and anxiety that she would have to wait her turn since she could see from a distance that there was already a crowd. She didn't feel disappointed so much as depressed to realise that she would be the eleventh to receive water. She had sensed the feeling in her brother's soul. He was tired. He was thirsty. She had felt like a mother as she issued from her home to fetch water, a mother going out to fetch food and drink for her loved ones at home. Now as she sat in a row with her fellow-sufferers, her heart sank. There was no sign of anyone passing that way who could be a possible benefactor. But she was patient. She had in her an inbred fortitude, obvious in her curious reserve, in her docile and peaceful bearing.
